

"MOM, DAD SINCE I COULD NOT GET A GIRL IN OUR NEIGHBOURHOOD  
I DECIDED TO MARRY A GIRL FROM THE NEIGHBOURING COUNTRY"

AN INTERNATIONAL CAMPAIGN

In three generations, more than 50 million women have been selectively eliminated from India's population through infanticide, dowry-related murders, and other gendercide practices.

- In 2011 it was estimated that there were 940 girls aged six and under for every 1,000 boys.
- 600,000 girls go missing every year.
- In 18 years' time, India will be short of 10 million brides.
